

**Come and join an award winning, fast-growing global financial technology company. We offer excellent benefits and opportunities to advance and learn alongside accomplished business and technology leaders.**

**Job title:** QA/Testing Manager

**Department:** Technology

**Salary:** Competitive

**Location:** London

**Job Description:**

We are looking for an experienced, hands-on QA/Test manager, with a strong focus on improving and automating end-to-end test processes. The candidate will be responsible for leading, improving and running our test/QA process to help us move fast and not break things.

Responsibilities include:

- Getting involved across our agile project teams to help define test cases and requirements and to make sure quality is kept at the heart of the process.
- Managing test activities and recording KPIs.
- Performing any manual QA testing as required.
- Reviewing test automation scripts to integrate with our CI/CD pipeline to ensure errors are caught as early as possible.
- Research tooling and best practices as needed to help us increase automation.

**Skills and Aptitude:**

- Strong background in, and 5+ years of working in QA or test automation.
- A thorough understanding of agile development environments/process.
- Good knowledge of SQL (Oracle preferred)
- A good understanding of the Linux command line
- Knowledge of scripting preferably using Python a plus
- Windows Desktop GUI Testing experience a plus.
- Proficient in bug tracking tools such as JIRA and Confluence
- Relevant degree from a good university
- An enthusiasm for technology.
- Ability to work pro-actively with minimal supervision.
- A willingness to get involved in detail and to get the job done.
- Excellent written and spoken English
- Team player

**About Torstone Technology:**

Torstone is a leading global provider of cross-asset post-trade securities and derivatives processing technology. We simplify the complexities of the post-trade landscape. Combining many decades of investment banking expertise with in-depth global financial market knowledge, we develop an innovative, secure and scalable solution. Modern, cloud-based fully integrated technology means our customers spend less time on manual processing and maintaining regulatory compliance, and more time with clients. Our aim is to help our customers drive revenue and greater operational efficiency, with reduced risk and better business performance.

We have a strong team of around 100 employees and are growing quickly. Our global headquarters is based in London with offices in New York, Toronto, Hong Kong, Singapore, and Tokyo.
