

Come and join an award winning, fast-growing global financial technology company. We offer excellent benefits and opportunities to advance and learn alongside accomplished business and technology leaders.

Job title: Implementation Consultant
Department: Professional Services
Salary: Competitive
Location: London

Job Description:

We are looking for an implementation Consultant to work as part of a team supporting new client software implementations and change initiatives for existing clients of Inferno. The Candidate is responsible for leading in complex implementation projects, gathering client requirements and translating them into a deliverable solution. The candidate will work closely with clients and colleagues to deliver business value throughout the project, from pre-sales through to go-live.

Responsibilities include:

- Take ownership of the technical and functional aspects of an Inferno implementation
- Provide client support during projects, including leading workshops, guiding acceptance testing and providing functional training to business users
- Support the sales pipeline by eliciting requirements and translating these to the functional scope for an implementation

Skills and Aptitude:

- 5 to 7+ years' experience as an implementation consultant or relevant experience in the post-trade space
- Securities post-trade knowledge and experience is a must have requirement, including equities, fixed income and financing trades. Derivatives experience is a nice to have.
- Knowledge of middle and back office workflow - including trade capture, trade confirmation/affirmation, settlement, reconciliation and accounting processes
- Experience providing functional consultancy and business analysis for software implementations, including, but not limited to, defining functional solutions, test planning and execution, user training, and supporting parallel runs and go-lives
- Well organised and able to manage own time effectively and that of others where tasks have been delegated
- Excellent oral and written communication and presentation skills
- Experience of post-trade market practice (CREST / SWIFT / CTM etc)
- Ability to process and summarise large quantities of technical detail, and learn quickly
- Experience of dealing with third party vendors (front office software vendors, exchanges / CSDs / regulators etc)
- Good presentation skills
- Relevant technical experience
- Familiarity with scripting languages (preferably Python) and the Unix command line
- Knowledge of SQL (Oracle preferred), XML
- Experience with GLOSS, RIMS, NOVA, Eclipse, Calypso, Murex or similar systems a nice to have
- Proven track record of implementation or business analysis in a post trade operations function within a securities firm or software vendor and are comfortable providing consultancy and configuring complex software on site.
- Hard working and motivated, with a logical mindset that combines deep analytical skills with the ability to work in a fast-paced customer driven environment.

About Torstone Technology:

Torstone is a leading global provider of cross-asset post-trade securities and derivatives processing technology. We simplify the complexities of the post-trade landscape. Combining many decades of investment banking expertise with in-depth global financial market knowledge, we develop an innovative, secure and scalable solution. Modern, cloud-based fully integrated technology means our customers spend less time on manual processing and maintaining regulatory compliance, and more time with clients. Our aim is to help our customers drive revenue and greater operational efficiency, with reduced risk and better business performance.

We have a strong team of around 100 employees and are growing quickly. Our global headquarters is based in London with offices in New York, Toronto, Hong Kong, Singapore, and Tokyo.
